

PUBLICATIONS (*since 1986*)

AUTHOR OF MONOGRAPHY

BAETEMAN, C., 2004. The Holocene development of a tide-dominated coastal lowland. Western coastal plain of Belgium. Field Guide. The QRA Third International Postgraduate Symposium Fieldtrip, September 17th 2004. Belgian Geological Survey, Brussels, Belgium, 76p.

CO-AUTHOR OF MONOGRAPHY

ZEEBROEK, I., TYS, D., PIETERS, M. & BAETEMAN, C., 2002. Van Schorre tot Slagveld. Een verkenning van Testerep, Leffinge en Oostende van de Vroege Middeleeuwen tot het beleg van Oostende (1601-1604). (in 4 languages) Vanden Broele Graphic Groep, Brugge, 72p.

EDITOR OF SPECIAL ISSUE OF SCIENTIFIC JOURNAL

BAETEMAN, C. (Ed.), 1989. Quaternary Sea-level investigations from Belgium. Prof. Paper, 6/241, 104p.

BAETEMAN, C. (Ed.), 1999. Quaternary of Belgium: New perspectives. *Geologica Belgica* 2, 1-2, 140p.

BAETEMAN, C., GEHRELS, R., (Eds) 2005. Late Quaternary coastal and marine deposits of Northwest Europe: A tribute to Hansjörg Streif. *Quaternary International* 133-134, 193p.

PAPERS IN SCIENTIFIC JOURNALS WITH INTERNATIONAL REFEREE

NEWMAN, W. & BAETEMAN, C., 1987 - Holocene Excursion of the Northwest European Geoid. *Progr. Oceanography*, 18/1-4, 287-322.

BAETEMAN, C., 1991 - Chronology of coastal plain development during the Holocene in West Belgium. *Quaternaire*, 2 (3-4), 116-125.

BAETEMAN, C. & PAEPE, R., 1991 - Planning and geology in a coastal plain. *Bull. Belg. Ver. Geol.*, 100/1-2, 195-201.

BAETEMAN, C., 1991 - Coastal Lowlands and their threat. The Shanghai case study. *Acta Geol. Taiwanica*, 29, 87-101.

BAETEMAN, C., BOGEMANS, F., GOVAERT, E., HUANZHONG, H. & JINGXIN, L., 1992 - The Quaternary deposits of the Changjiang Coastal Plain (Shanghai Area). *Bull. Intern. Assoc. Eng. Geology*, 46, 7-23.

DENYS, L. & BAETEMAN, C., 1995 - Holocene evolution of relative sea level and local mean high water spring tides in Belgium - a first assessment. *Marine Geology*, 124, 1-19.

PIETERS, M., BAETEMAN, C., DEMIDDELE, H. & ERVYNCK, A. - 1998. The polder area of Raversijde (Oostende, Belgium): a complex parent material affected by intense human interventions. Archaeology as a tool in geopedology. *Proceed. 16th World Congress of Soil Science*, Montpellier, France, Vol. 1, 1-10.

BAETEMAN, C., BEETS, D.J. & VAN STRYDONCK, M. - 1999. Tidal crevasse splays as the cause of rapid changes in the rate of aggradation in the Holocene tidal deposits of the Belgian Coastal Plain. *Journal of Quaternary International*, 56, 3-13.

BAETEMAN, C. - 1999. The Holocene depositional history of the IJzer palaeovalley (Western Belgian coastal plain) with reference to the factors controlling the formation of intercalated peat beds. In: BAETEMAN, C. (ed.) (1999). *Quaternary of Belgium: New perspectives*. *Geologica Belgica*, 2, 1-2, 39-72.

ERVYNCK, A., BAETEMAN, C., DEMIDDELE, H., HOLLEVOET, Y., PIETERS, M., SCHELVIS, J., TYS, D., VAN STRYDONCK, M. & VERHAEGHE, F. - 1999. Human occupation because of a regression, or the cause of a transgression? A critical review of the interaction between geological events and human occupation in the Belgian coastal plain during the first millennium AD. *Probleme der Küstenforschung im südlichen Nordseegebiet*, 26, 97-121.

- VAN STRYDONCK, M., ERVYNCK, A., BAETEMAN, C. & LENTACKER, A. - 2000. ¹⁴C Dating and the reconstruction of the sedimentary environment and occupational history of Saltes (Atlantic coast, Southern Spain). *Environmental Archaeology*, 5, 63-71.
